

SMT Splice Carts

SR.CRT.3E

SR.CRT.3J

The SMT Splicing Carts are ideal for splicing SMT component reels to dramatically reduce downtime on pick-and-place equipment. The cart rolls up to the feeder bank for easy splicing of reels and features storage space for spliced strips. Additionally, the cart offers storage for splicing tools. These carts can be used with our Stapler type Splice Tools.

*** Note: Tools, splice tapes and clips are not included and must be purchased separately.

Features:

- * Convenient
- * Ergonomically designed
- * Easy to use
- * Durable steel construction
- * Increased productivity through automation
